

# Care Area Trigger Specifications Change Document (v1.00.3)

4/22/2010

The following changes to the Care Area Technical Documents were made from V1.00.2 to V1.00.3.

## CAT 01 Delirium

### Triggering Condition 1

- Reference to “A031A” corrected to A0310A.

## CAT 20 Return to Community Referral

- The CAT 20 item list, triggering conditions, and pseudocode (SAS) have been added to the “MDS 3\_0 CAT Specifications 1\_00\_3 (04-22-10).pdf” document. This represents a new corrected CAT 20 triggering definition that differs from the incorrect definition last present in version 1.00.
- The single MDS 3.0 trigger item (Q0600) has been added to the MDS 3.0 CAT item list (“MDS 3.0 Items in the CAT Test Data Files 1\_00\_3.csv”) and Table 2 of “MDS 3.0 CAT Test Data Documentation 1\_00\_3 (04-22-10).pdf”.
- An appropriate CAT 20 test data file has been developed (“CAT20\_test\_v2.txt”) for the new corrected definition.
- The SAS code file (“CAT Triggers v1\_00\_3.sas”) has been revised to include the new corrected CAT 20 triggering definition.
