Care Area Trigger Test Data Change Document (v1.00.3)

7/29/2010

One change has been made to the CAT v1.00.3 test data. The test data ZIP file has been changed from "CAT Test Data Files v_100_3 (04-22-10).ZIP" to "CAT Test Data Files v_100_3 (07-29-10).ZIP". The previous ZIP file included the wrong CAT 20 test data file ("CAT20_test_v1.txt"). This file is not consistent with the current definition of CAT 20. In the new ZIP file, "CAT20_test_v2.txt" replaces "CAT20_test_v1.txt".

CAT20_test_v2.txt is appropriate to the current definition of CAT 20, which triggers when Q0600 (referral has been made to local contact agency) = 1, indicating that a referral has not been made.

This is the only change made.
